

Excelon for Schools

Facilitating more effective school communications and service.

IMPROVE COMMUNICATION

Research from BECTA shows that "children are more successful in school if their parents are more involved in their education". Frequent but well-targeted communication goes down well with parents.

BRING ADMIN COSTS DOWN

Integrated web based reply and consent forms give big savings in paper, postage, admin costs and workload.

ENHANCE SERVICES

Collect and manage fees and other payments electronically, online homework assignments, enable emergency communication, provide updates on events.

We provide every school with **free, unlimited raining and support.**

We're here to help schools get the most from our system.

For more information on any of our products or services, please visit us at: www.excelon.co.uk

Excelon for Schools is a powerful school-parent communication system which incorporates email, text messaging, secure Internet-based access to documents, and online reply and consent forms into a wide-ranging, customisable package. It is an inclusive system which parents, staff and pupils can all engage with to improve school communications.

All the information is accessed securely using unique user name and passwords.

COMMUNICATIONS

Easily send email and/or text messages to individuals, year groups or all parents. A record of all messages sent is retained; you can also see which parents have viewed messages. This is especially useful for unforeseen events, such as snow and urgent school closures.

ABSENCE REPORTING

Send text or email messages to parents to notify them their child is absent and ask them to let the school know where their child is. Early detection of absence can help parents and teachers tackle truancy.

TRIPS

Online communications make school trip management easier. You can allow parents to 'give consent' digitally so they don't have to print, sign and return forms. This is especially quick and easy for parents and it improves response rates significantly. Structured reply data gives big savings in admin time. No more lost letters, no more chasing and collating replies!

CALENDAR

An online calendar, managed by the school, makes it easy for you to inform and share important dates with parents. Every time you create a trip or event, parents are automatically alerted and the item appears in their calendar. You can also input other important dates, like, inset or training days and these will appear in parents' calendars too.
